

Did you ever ask yourself, where you will live when you are old? You probably have images of care homes in your mind right away. And most likely you feel slightly uneasy about that. Most people feel the same and would prefer to stay in their own home as long as possible.

CARU is a young Zurich based company. We ensure safety and wellbeing in living environments. Our smart IoT system enables care takers and patients to connect more efficiently – both in emergencies and in every day live. In turn, we empower people to live independently.

We are looking for a

## Senior Manufacturing Engineer (100%)

### Responsibilities & Tasks:

- Responsible for transitioning our CARU hardware from prototyping into manufacturing, i.e. develop and define manufacturing processes
- Make recommendations for product design changes and final assembly standards that have direct impact to final product cost, quality and delivery
- Drive Design for Manufacturing and Design for Reliability reviews of our NPI CARU hardware and lead DFA/DFM activities to come to an optimal product design
- Perform all aspects of Manufacturing Engineering activities with regard to Product Build/DFM and DFT
- Create and optimize modular BOM structures for production release
- Negotiation with ODMs and parts suppliers

### Requirements:

- 3+ years DFx, NPI and Manufacturing Process Engineering with external manufacturers
- 3+ years of Contract Manufacturing experience
- Knowledge of industry best practice for design for manufacturability and testability
- Working knowledge of mechanical and PCB drawing
- Ability to travel up to 20% of the time
- Excellent communication skills, oral and written, in English and German
- Swiss work permit

Our highly motivated team has many years of experience in setting up startups and developing consumer products. As a team member you will take responsibilities in your field early on and you will get the great opportunity to shape CARU with your own initiatives.

Are you excited about working in an extremely dynamic environment? Would you like to work in a large emerging market? Are you passionate about innovative solutions? Then we look forward to receiving your electronic application!
