

Did you ever ask yourself, where you will live when you are old? You probably have images of care homes in your mind right away. And most likely you feel slightly uneasy about that. Most people feel the same and would prefer to stay in their own home as long as possible.

CARU is a young Zurich based company. We ensure safety and wellbeing in living environments. Our smart IoT system and information platform enables care takers and patients to connect more efficiently – both in emergencies and in every day live. In turn, we empower people to live independently.

We are looking for a

## Python Developer (100%)

### Responsibilities & Tasks:

- Implement a state-of-the-art SW architecture for the CARU platform
- Ensure that that our architecture and code base is clean, maintainable and scalable
- Collaborate with a team of (external) front and backend developers
- Build and manage an operations infrastructure

### Requirements:

- Strong python development skills with a bachelor's or master's degree in computer science, engineering or equivalent industry experience
- 2+ years with development of highly scalable website/services
- Proficiency with back and front end
- Proficiency with large databases, its design and maintenance
- Big data and streaming frameworks is a plus (e.g. Spark, Kafka, etc.)
- Must be a self-starter enjoying to work in agile engineering teams
- Willingness to travel abroad
- Swiss work permit or EU passport

We offer flexible work schedules and remote work.

Our highly motivated team has many years of experience in setting up startups and developing consumer products. As a team member you will take responsibilities in your field early on and you will get the great opportunity to shape CARU with your own initiatives.

Are you excited about working in an extremely dynamic environment? Would you like to work in a large emerging international market? Are you passionate about innovative solutions? Then we look forward to receiving your electronic application!
